Practice I

Regular expressions

Specifications

- Use regular expressions to extract the following strings in the corpus of tweets:
  - Hashtags
  - Users
  - URLs
  - Time (18:30, 5 hrs, 3 am, and any other format you can find)
  - Emoticons in ascii :D, :), :p, and any other you can find
  - Emojis (https://unicode.org/emoji/charts/full-emoji-list.html)

Specifications

- You must generate a table for each of the extracted string types with the following information

String	Frequency	Top 10
Hashtags	500	#tendency1, #tendency2, …, #tendency10
Users	350	
…	…	

Evidence

- Upload to Teams the source code of your program and the document with the generated tables
